

## KEYSTONE EPI-2 ELECTRIC ACTUATORS

The EPI-2 series are compact, intelligent quarter-turn electric actuators for the accurate control of valves with torques from 35 to 2000 Nm / 308 to 17,700 lb.in.

### FEATURES

- Low or high voltage single phase DC or AC power supply with 3-phase option
- Multiple adjustable stroking times to suit specific applications
- Interchangeable base plate and range of shaft inserts enable simple connection to any valve type
- Intelligent control unit prevents overheating
- Epicyclical gearing ensures reliable and smooth operation
- Top-mounted position indicator
- Constantly-engaged, hand wheel-operated manual override in case of power failure
- Bluetooth™ wireless connectivity for non-intrusive configuration, operation and diagnostics
- Optional local control panel for manual valve operation with additional open/close indicator
- Simple upgrade options for modulating control and network communication via DeviceNet or Profibus DP protocols
- Latched-type output contacts for fully open/fully close remote indication. Output contacts for monitor and blinker/local selector indication are also available

Bluetooth™ is a trademark of Bluetooth SIG, Inc, USA

### GENERAL APPLICATION

The EPI-2 is available in six sizes and is designed for on/off or modulating control of butterfly, ball, rotary plug valves or dampers in a wide range of heavy industrial, chemical and petrochemical plants on and offshore.

### APPROVALS

Waterproof: IP66/68 or NEMA 4/4X/6 (NEMA ICS6/NEMA 250) CAN/CSA C22.2 No 139-10 and UL 429-2009

Explosionproof: Ex d e IIB T5 Gb (Gas) Ex tb IIIC T100°C Db (Dust) (prefix c for model 2000)

### TECHNICAL DATA

Power supply: Single phase from 24 to 48 V DC or AC at 50/60 Hz  
Single phase from 100 to 240 V DC or AC at 50/60 Hz  
3-phase from 208-240 V AC, 380-480 V AC and 500-575 V AC

Voltage fluctuations: +/- 10%

Frequency: +/- 5%

Torque output: From 35 to 2000 Nm / 308 to 17,700 lb.in.

Ambient temperature  
Standard range: -25°C to +70°C / -13°F to 158°F

Low temp range: -40°C to +70°C / -40°F to 158°F

Conduit entry: M25/1" NPT

## DESIGN FEATURES

---

### **Mechanical connection to the valve**

EPI-2 actuators feature a multi drilled base plate and a range of drive inserts to allow direct mounting to almost all valve types according to the EN ISO 5211 and other manufacturers' standards.

### **Power supply**

EPI-2 can simply be connected to the local power supply. It accepts any single phase input voltages (from 24 to 48 V DC or AC and 100 to 240 V DC or AC). Alternatively 3 phase voltages from 208-240 V AC, 380-480 V AC and 500-575 V AC are also available

### **Electric motor thermostat**

A thermostat to protect the motor temperature in hot applications is included as standard in the control circuit of the electric actuator.

### **Heater**

A heater is standard available within the unit and is powered from the motor power supply. It is automatically activated when the temperature drops below 10°C in order to prevent condensation.

### **Actuator service**

The standard actuator is suitable for open/close and modulating applications.

### **Compact and light design**

EPI-2 actuators are very compact and balanced for easy installation to small valves minimizing pipe work stress or loads to the valve shaft.

### **Actuator configuration**

Each actuator is equipped with 2 rotary switches on the logic board to configure each function and parameter like position, torque, open/close speed and output contacts. Additionally each optional module has its own additional switches for its specific configuration.

### **Local manual override**

A constantly engaged manual override (not rotating during motor operation) is fitted to all EPI-2 actuators.

### **Torque and sizing**

The EPI-2 range comprises of six models, for operating torques of up to 2000 Nm / 17,700 lb.in. with a configurable operation time from 15 to 180 seconds. The nominal output torque value is constant along the entire stroke.

### **Non-intrusive configuration**

With Bluetooth® wireless technology enabled on your PDA or PC all configuration requirements can be undertaken without opening the unit. Direct access to the EPI-2 is then available for configuration and predictive/preventative maintenance information, including valve position, actuator speed, output torque, alarm and status.

### **Position monitoring**

The EPI-2 provides a local mechanical position indication. For remote indication the position is detected by a non-contact sensor. The open and close position are configured via the electronic control card.

### **Electronic controls**

Internal drive to reverse the actuator rotation direction via remote control signals with internal 24 V DC or external 24 V DC/AC up to 120 V DC/AC power supply.

### **Output contacts**

4 latched-type output contacts for fully open/fully close remote indication; 1 output contact for monitor (loss of power, torque alarm, high temperature alarm, travel alarm, position sensor, hardware malfunction, local interface malfunction, local selector in LOCAL); 1 output contact for blinker/local selector indication (local selector feature only with OM3 installed).

## OPTIONAL MODULES AND PERFORMANCE

### OPTIONAL MODULES

#### OM1 I/O additional module

Analog position INPUT 4-20 mA or 0-10 V DC  
 Analog position OUTPUT 4-20 mA or 0-10 V DC  
 4 additional SPST output contacts  
 Optional Bluetooth interface

#### Monitor relay

Information about loss of input signal and Bluetooth failure are available on monitor relay output contact.

#### OM3 local interface

Local/remote selector  
 OP/CL pushbuttons  
 2 LEDs for local indication  
 Available in WP version

#### OM13 3-wire module

110/240 V AC  
 3-wire control module for open/close

#### Bus communication – network interfaces

OM9) Profibus DP V0/V1  
 OM11) DeviceNet

### NOTES

- Each optional module (OMx) will be provided with its own installation and maintenance instructions.
- All modules except OM13 are available for both single phase and 3-phase voltage versions.
- Bluetooth component is integrated in the OM1, OM9 and OM11 card: not available for integration by local organizations, as a stand alone unit.
- OM13 is not available with 3-phase supply and for LV version (single phase voltage from 24 to 48 V DC/V AC).

### KEYSTONE DIRECT MOUNT SYSTEM

The same direct mounting brought to the market place by Keystone for valves and actuators, with even more flexibility.

Keystone Valve pioneered the direct mounting compact valve actuator system.

The EPI<sub>2</sub> continues this customer oriented system with additional flexibility aimed at allowing the customer more actuator with every purchase.

The EPI<sub>2</sub> has dual mounting bolt circles and dual shaft acceptance with most units.

This feature allows coverage of more valve sizes and types with less actuator models.
